At Cigna, your health and well-being is important to us. We want you to live life to the fullest. Taking your preventive medications regularly can help you get – and stay – healthy.

**Health care reform requires coverage of certain preventive medications at no cost-share to you**

Health care reform under the Patient Protection and Affordable Care Act (PPACA) requires plans to cover certain preventive medications and products at 100%, or no cost-share ($0) to you.* The U.S. Preventive Services Task Force and the Institute of Medicine provides guidance on which drug classes should be covered. These recommendations are meant to help prevent disease, as well as meet women's unique health care needs.

**Preventive medication coverage**

This drug list shows the prescription medications and over-the-counter medicines (available without a prescription) and products available to you at no cost-share (copay, coinsurance and/or deductible). This list is updated as the U.S. Preventive Services Task Force makes new recommendations.

You should log into myCigna.com or check your plan materials to learn more about how your plan covers preventive medications. You can also use the Drug Cost tool to estimate how much your medications may cost.

**Religious exemptions to the coverage of contraceptives**

PPACA allows certain employers to exclude contraceptives from coverage due to religious beliefs. If you're a woman with medical coverage though one of these employers, Cigna will let you know that your plan does not cover these medications. Where required by law, Cigna will offer to pay for your contraceptives and/or certain medications at no extra cost to you (if you choose). This coverage is private and confidential and isn’t administered, funded by or connected in any way to your employer’s health coverage.

**Choosing the right preventive medication**

There are many preventive medications covered under PPACA. You should talk with your doctor to find out which medication or product may be right for you. If your doctor feels a certain contraceptive medication or smoking cessation medication on this list isn’t right for you, ask your doctor to call us. Together, we’ll look for other medications and products (not on this list) that may be available at no cost-share to you. For preventive medications (including over-the-counter medicines) to be covered, you’ll need to get a prescription from your doctor.

*The no-cost share preventive coverage under the Affordable Care Act remains in effect at this time. Should health care reform change, we will review the guidance at that time.*

Together, all the way.

Offered by: Cigna Health and Life Insurance Company, Connecticut General Life Insurance Company or their affiliates.

+ For plans renewing on or after November 1, 2017, these medications are covered at no cost ($0) as preventive medications under the Patient Protection and Affordable Care Act (PPACA). This means that, as of your plan's renewal date, you won't pay any money to fill a prescription for these medications. PPACA coverage requirements do not apply to all plans; for those plans, you'll have to pay your plan's preventive cost-share to fill these medications. To find out how your plan covers PPACA preventive medications, log into myCigna.com and use the Drug Cost tool or check your plan materials.
