**CHOOSING A HEALTH PLAN HAS NEVER BEEN SIMPLER**

MyClearview will help you pick the health plan option that will likely result in your lowest overall cost given your expected medical needs. After answering a handful of multiple choice questions, the proprietary algorithm provides a personalized financial analysis and recommendation, considering both premium and expected out-of-pocket cost (co-pays, etc.).

Unbiased...simple to use...informative.

### Using MyClearview

**Step 1: Login to the UR site**
Go to www.clearviewlogix.com. After browsing, find the Login button in the upper right corner, click on it and type user name "richmond" and password "spiders."

**Step 2: Answer 4 questions**
After accepting the user agreement, the model will walk you through 4 simple multiple choice questions about your medical needs. You can finish in a couple minutes, no research required.

**Step 3: Review Analysis and Recommendation**
MyClearview provides a financial analysis that ranks the plans based on finding the highest value, providing the services you need for the lowest total cost.

**Step 4: Enroll**
Run multiple scenarios if you like. Once you make a decision, return to our enrollment system to make your selection.

### How It Works

MyClearview is based on credible normative data from millions of consumers, advanced statistical analysis and decades of medical and health insurance expertise. Our model incorporates what we’ve learned from helping thousands of employers, employees, and individuals make value-based decisions in selecting a health plan, just like the analysis one would do in making any major purchase, like a car or home.

Larry Colley, M.D. (Yale University and University of Virginia Medical School) is the primary developer of the MyClearview algorithm, following years as a health insurance medical director and founder of a health care benefits advisory firm.
